

# MGP 24

**PROFESSIONAL neutral cleaner for any kind of surface.**

**SOLVENT and ACID FREE**

Safe, efficient, universal detergent with pleasant fragrance. Recommended both for maintenance and everyday cleaning of treated surfaces. Suitable for floors, cladding, tables and kitchen countertops of marble, granite, ceramic, composite, natural stone, with any kind of finish; polished, matt, brushed etc.

Being acid and solvent free MGP 24 can be daily and constantly used protecting both the materials and the treatments applied on them.

## Strong points

Concentrate  
High dilution ratio  
Neutral detergent  
Not aggressive on treatments

Universal, suitable for any kind of surface  
Scented  
Non-residual  
Solvent and acid free

**Coverage:** Approx. 100-400 m<sup>2</sup> with 1 liter depending on the finish of the surface and on the dirt. This indication may vary according to the type of material and absorbency.

## Application

### SHAKE BEFORE USING.

#### CONCENTRATED PRODUCT.

*Manual cleaning:* Dilute 1 liter of MGP 24 in 50-60 liters of water. Pour the solution onto the surface, rub using a floor brush, mop, pad, microfiber or other manual tools. Allow to dry before using the surface. In case of everyday cleaning no rinsing out is needed.

*Cleaning with machines:* Dilute 1 liter of MGP 24 in 50-60 liters of water and proceed with the cleaning using the product in the man on board cleaning machine, in the tanks of the single disc cleaning machines or in similar machines that require the use of a detergent. Allow to dry before using the surface.

## Warnings

Before using the product, read the toxicological data sheet (MSDS) and the label detailing all risks and the personal protective equipment to be used for a correct use. The data of this technical data sheet is based on reliable information. Despite of this, not knowing either the materials to be treated nor their conditions, the specific characteristics, the processes and finishes they have undergone, the conditions of the treated materials and the way in which the product will be used, we decline any and all responsibility for damage arising from inadequacy of the product for specific and particular applications.

Therefore, before using the product, carry out a test on an invisible area of the surface and only when sure about the success, proceed on a larger area.

Our responsibility is limited to the cost of the purchased product and therefore we are not liable for damages resulting from negligence or incorrect or different use of the product, from not following these warnings or by other factors that do not depend on the product itself.
